ELANTRA

Dare to be you.

Question the old rules. Dare to challenge the status quo and find greater courage without fear of failure, challenge tradition, and prejudice to find opportunities for innovation. Be in charge of today through passion and effort, open up the world of tomorrow using your own standards. Do not hesitate, but stay bold and go for those big dreams.

Features

Bold inside and out. Transformed and loaded with technology, the all-new ELANTRA takes the spotlight with a giant leap into modern style and intelligent convenience.

Parametric jewel pattern chrome radiator grille

Parametric jewel surface

LED rear combination lamp

H-tail lamp
Creates a strong visual identity and high-tech image by representing 'H' in Hyundai that stretches across the rear.

LED headlamps

Aerodynamic air curtain

17" Alloy wheel

Exterior sideview mirrors
(heated, power folding, LED turn signal indicators)

Rear aircon vent

Dual full auto air conditioning

Electric parking brake with auto hold

Front ventilated and heated seats

Bring the limelight to you.

Get inside the all-new Elantra, and you'll feel the attention to detail instantly. The immersive interface cocoons the driver like a cockpit that surrounds a pilot, offering easier control and an enveloping, advanced driving experience.

10.25" Supervision TFT LCD full color cluster display

Integrated driving mode (Normal, Eco, Sport, Smart)

8" Display with Android Auto™ and Apple CarPlay™

Wireless smartphone charger

You take the lead.

The all-new Elantra's newly developed 3rd generation platform delivers agile handling and stability, while the new Smartstream G1.6 engine provides optimal driving performance wherever you go. Coupled with the new Smartstream IVT (Intelligent Variable Transmissions) that reflects the driver's intent and driving conditions, making the drive more responsive in every way.

IVT - 8 virtual-speed transmission
The Smartstream IVT has shown a 4.2% improvement in fuel economy and a 5-8% reduction in engine power loss.

Smartstream G1.6

123 Maximum power
PS/6,300 rpm

154 Maximum torque
Nm/4,500 rpm

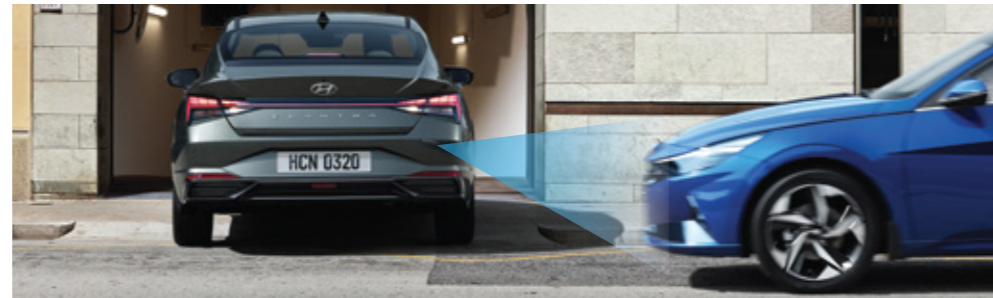

Smartstream
TECHNOLOGY

Hyundai SmartSense™

Hyundai's cutting-edge driver assistance system, built to provide you with more safety and peace of mind. From braking to avoid collisions, to detecting vehicles in your blind spot, SmartSense™ systems constantly monitor your environment to protect you from potential hazards while driving.

Blind-Spot Collision-Avoidance Assist (BCA)
When operating the turn signal switch to change lanes, if there is a risk of collision with a rear side vehicle, it provides a warning. After the warning, if the risk of collision increases, it automatically controls the vehicle to help avoid a collision.

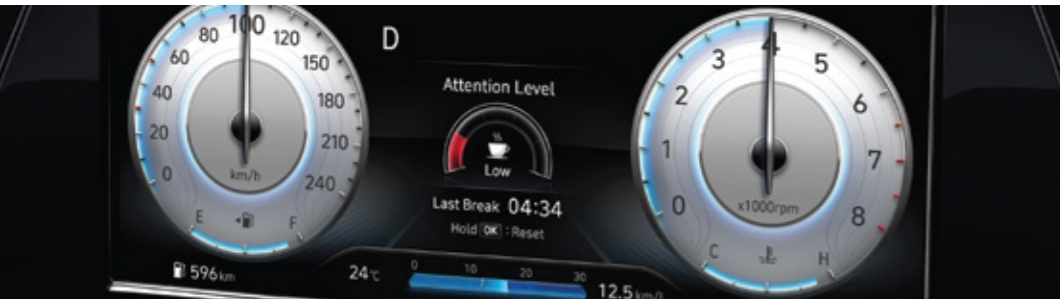

Rear Cross-Traffic Collision-Avoidance Assist (RCCA)
If there is a risk of collision with an oncoming vehicle on the left or right side while reversing, it provides a warning. After the warning, if the risk of collision increases, it automatically assists with emergency braking.

Forward Collision-Avoidance Assist (FCA)
If the preceding vehicle suddenly slows down, or if a forward collision risk is detected, such as a stopped vehicle or a pedestrian in front, it provides a warning. After the warning, if the risk of collision increases, it automatically assists with emergency braking. While driving, if there is a risk of collision with a cyclist, it automatically assists with emergency braking. If there is a risk of collision with an oncoming vehicle while turning right at an intersection, it automatically assists with emergency braking.

Smart Cruise Control (SCC) with Stop & Go
Smart Cruise Control helps maintain distance from the vehicle ahead and drive at a speed, set by the driver. The vehicle stops automatically and starts automatically if the vehicle in front starts in a short time. If a period of time has elapsed, start again by pressing the accelerator pedal or operating the switch.

Driver Attention Warning (DAW)
Displays the driver's attention level while driving. Provides a warning when signs of driver inattentiveness are detected, and recommends a rest if needed. The driver should stop and park in safe place and get plenty of rest before driving.

Leading Vehicle Departure Alert (LVDA)
During a stop, the driver is alerted if the leading vehicle departs.

Lane Keeping Assist (LKA)
A steering assist function that detects lane markings to monitor the vehicle's position in the lane. Should the vehicle stray from the intended lane without activating the indicator, an audible and visual warning will be sounded and when required, will provide steering intervention to keep the vehicle from steering out of the lane.

Lane Following Assist (LFA)
Detects lane and vehicle ahead on the road with a front view camera on the front wind-shield, and assists the driver's steering to help keep the vehicle centered between the lanes.

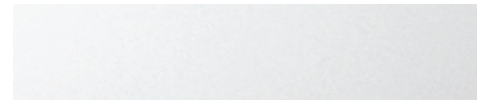

Safe Exit Warning (SEW)
This pioneering innovation may sound an alert when a vehicle approaches from behind, letting passengers know it may not be safe to open the door to exit the vehicle.

Rear Occupant Alert (ROA)
As the engine is turned off, a visual warning in the instrument cluster reminds you to check the rear seats before exiting the vehicle.
